Davone 2022

Loudspeakers and Accessories

Davone

Hello from Davone

With production and development based in Denmark, a country renowned for its design and acoustics, Davone has build loudspeakers by hand since 2007. The combination of the highest quality in sound and design makes Davone a pioneer in High-End audio.

Following Danish traditions, a flexible and small scale production gives Davone the freedom to experiment and implement ideas that would not be possible to sustain in large scale production. This enables us to only make innovative products we are really proud of. And we know that the Davone customers appreciate this extra effort.

With long lasting ownership in mind, the focus is on enjoying music. And with their signature appearance, the Davone loudspeakers offer more than High-End sound quality alone. A far cry from mass produced anonymity, the timeless Davone loudspeakers remain intriguing for many years to enjoy in sound and design.

DKK PRICE LIST 2022

Wireless Transmitters

A WiSA transmitter is all you need to connect your wireless Davone loudspeaker to your system.

WiSA is a wireless audio standard and several transmitters are available, each with their own unique benefits. Our recommended transmitters are the Primare SC15 Prisma pre-amplifier and the WiSA SoundSend. The Primare is tested thoroughly by Primare and the SoundSend is a very basic and therefore also reliable design. Other more complex transmitters can be more troublesome in our experience and are therefore not recommended.

Wireless DSP options and accessories		Retail per piece
	WiSA SoundSend - 3rd party vendor. The SoundSend is perfect for stereo or multichannel home cinema use over HDMI-ARC. Another great application is to connect the SoundSend over Toslink to a reliable streamer from Bluesound, Sonos or Heos.	1.800
	Primare SC15 Prisma - 3rd party vendor SC15 Prisma is a full-featured pre-amplifier and network player incorporating WiSA high resolution wireless speaker connection technology.	11.900
